

CMSC320 Introduction to Data Science

Writing Assignment 6

Read the first 2 sections of the Google course on clustering

(<https://developers.google.com/machine-learning/clustering>): “Overview” (45 min) and “K-means clustering” (35 min). While clicking on the hyperlinks inside the course is not required, it may help your understanding.

In your write-up, address the following questions:

1. For each of the below subsections, summarize it and mention its main point
 - a. What is clustering?
 - b. Clustering algorithms
 - c. Clustering workflow
 - d. Data preparation
 - e. What is k-means clustering?
 - f. Manual similarity measure
 - g. Evaluating results
 - h. Advantages and disadvantages
2. Summarize the overall course (limited to the 2 sections that you read) and its goals as you see them.
3. What did you learn from this course that augmented your learning from the lectures?
4. What was good about the overall presentation of the material in this course?
5. In what way could the presentation of the material be made more effective, given how *you* learn?

Tip: For each question, write at least 1 paragraph and no more than 2. (1a, 1b and 1c are separate questions, as an example.) Treat this as an opportunity to reflect and share your thoughts. You will be graded on **effort**, but **leniently**.

Submission Instructions: Submit a **pdf** file to Canvas.

Name the file as follows: ‘CMSC320_WA6_YourName.pdf’

REMEMBER: The use of AI tools in generating responses is not allowed.
