

# CMSC320 Introduction to Data Science

## Writing Assignment 1

Watch the video “What is Data Science?” from IBM Technology ([youtube.com/watch?v=RBSUwFGa6Fk](https://youtube.com/watch?v=RBSUwFGa6Fk)) and answer the following questions:

1. **Key points.** What are the main things the presenter is telling us about? Please write at least 5 sentences.
2. **Goal.** What would you say the goal of the video is? Note that we know that the response here is subjective as we can't know the exact correct answer. Do think about why IBM Technology wanted to make the video, not just what they wanted to communicate with it.
3. **Things you learned.** What are the things that stood out to you as something you didn't think of/didn't know before, if anything?
4. **Presentation style.** How did the presentation style help or hurt your learning? If you were now to present similar concepts, would you adopt the same presentation style or change something?
5. **Questions that remain.** In this short video it makes sense that things are presented at a high level. If there were a longer (say 30-minute) version of this same video, what concepts would you like to hear more about?

**Tip:** For each question, write at least 1 paragraph and no more than 2. Treat this as an opportunity to reflect and share your thoughts. You will be graded on **effort**, but **leniently**.

**Submission Instructions:** Submit a **pdf** file to Canvas.

Name the file as follows: “CMSC320\_WA1\_YourName.pdf”  
(or “DATA320\_WA1\_YourName.pdf” if you'd like).

**REMEMBER:** The use of AI tools in generating responses is not allowed.
